Forecast for Saturday 05 Feb 2022

Weather: A dry start but outbreaks of rain arriving, falling as snow for a time above 600m. Rain turning persistent and heavy in the afternoon and lasting for the rest of the day with little respite. Some snow returning above 900m in the evening. Very windy with horizontally driven rain giving drenching conditions.

Chance of cloud-free hill tops above 800m: 60% overnight and to start the morning but falling to 20% in the afternoon.

Low Cloud and visibility: Patchy cloud and fog above 600 or 700m during the morning, but turning persistent and extensive through the afternoon with patches on lower slopes. Extensive fog giving difficult navigation conditions. Below the cloud, hazy, often down to a few km in rain in the afternoon.

Forecast for Saturday 05 Feb 2022

Meteorologist's View

Difficult and hazardous conditions over high ground with severe gales, persistent rain, poor visibility and a severe wind chill setting in. A day to be in the shelter of the valleys.

Forecast for Sunday 06 Feb 2022

Weather: Mostly cloudy with further showery outbreaks of rain, sleet or snow, perhaps merging to longer spells in the afternoon. The falling-snow level is expected to be above 900m at first but lowering to 600m in the morning. Low confidence for this aspect of the forecast. Strong winds and severe wind chill at height.

Maximum wind: West or Northwest 30 to 40mph gusting 60mph, easing to 25 to 30mph gusting 40mph during the evening.

Chance of cloud-free hill tops above 800m: 40%.

Low Cloud and visibility: Fast-changing through the day with cloud descending to 500 or 600m at times in showers with very poor visibility in snow showers. Occasionally very good between showers.

Temperature: **Valleys:** Plus 6 or 7 Celsius, falling to Plus 2 Celsius in the evening.
At 800m: Plus 2 Celsius overnight, falling to Minus 1 Celsius in morning.
Freezing level: 1100m falling to 700m.
